

## Cardinal Preschool Immunization Requirements

Note the changes to the Washington state law below. When submitting your application materials the immunization form now needs to be medically verified.

See the three options below to submit a medically verified form. Your records must be complete before your child can start school.

### Medically Verified Records

Starting on August 1, 2020, the revised rule requires medically verified immunization records for school and child care entry. Medically verified record includes one or more of the following:

- **A Certificate of Immunization Status(CIS) printed from the Immunization Information System (IIS). Your doctor's office can do this.**
- **A physical copy of the CIS form (available on our website) with a healthcare provider signature.**
- **A CIS printed from MyIR <https://wa.myir.net/>**

### Changes to State Immunization Rules for Schools and Child Care Effective August 1, 2020

The State Board of Health (SBOH) has approved changes to Chapter 246-105 of the Washington Administrative Code (WAC) concerning school and child care immunization policy. These rules apply to all public and private schools and licensed child care centers in Washington State.

The update to Chapter 246-105 WAC has three major focuses:

- It now requires medically verified immunization records for school and child care entry.
- It clarifies conditional status in regards to school and child care immunization requirements and implementation.
- It changes the Tdap immunization requirement to 7th through 12th grades.
